Individual hook-and-loop
label exchange

STAVANGER XL5000

Open up the front flaps and get in!

With its 77 liters, the STAVANGER XL5000 has the largest storage space of our STAVANGER backpack models. Room for everything you need. Our newly developed ampoule kit for holding up to 300 ampoules fits into the lower compartment with its magnetic system. Alternatively, store our system plate or a standard AED defibrillator. The upper front pocket holds small diagnostic devices, including Robin rescue scissors. Between the front and the inner body is the compartment for the immobilization collar. To organize the interior, we offer various container and system modules, such as an O2 bottle holder.

Proven magnet system
for hygienic cleaning

2-part PVC case
handle

Insert tray with trans-
parent foil for individual
inscription

Elastic loops for
securing items

Device for Robin rescue scissors

Front pocket for the storage of
AED defibrillators, tablet or XL con-
tainer/system modules with magnet
system

Integrated magnet system
in the lid
