Uniflex® Ideal

Uniflex® Ideal is suitable for supporting and fixing bandages, such as for fixing wound dressings. The permanently elastic Ideal bandage consists of 62% cotton and 38% polyamide, the high synthetic fiber content ensures that material fatigue is prevented. The latex-free Uniflex® Ideal is permeable to air and has a longitudinal elasticity of approx. 75%. The Ideal bandage can be sterilized in an autoclave and offers high absorption of liquids.
