STAVANGER V3000

STAVANGER V3000

A specialist for special applications

The STAVANGER® V3000 is our TRAUMA bag and was designed to fit perfectly in compartment 21, in accordance with the uniform state standard for ambulances in Rhineland-Palatinate 2018. Among other things, the bag offers sufficient space for use with trauma patients. In addition to immobilisation collars, pelvic slings and universal splints can also be stowed in the interior. The large foil compartment is used to hold emergency materials. The lid has been equipped with 7 practical rubber loops for small items such as skin disinfection, instruments, ligation systems and emergency bandages. The emergency bag comes with a shoulder strap for comfortable carrying. The bag is also available in a filled version for trauma care.

Truck tarpaulin, Original-CORDURA® fabric and 3MTM Scotchlite reflective strips
