NOBAMED Paul Danz AG

NOBASORB®-sterile

REF 740113

Product Description and Purpose

The sterile absorbent wound pad with a **size of 10 cm x 15 cm** consists of a soft nonwoven which wraps an absorbent core of soft, bleached fluff pulp and a cellulose layer for the distribution of secretions. On its back, the pad is provided with a nonwoven layer that is impenetrable to liquids. The absorbent wound pad is used for the treatment and cleansing of heavily exuding, infected or chronic wounds. It may also be used in the case of weeping wound healing disorders, for wound padding, and as secondary dressing for heavily exudating wounds. It is for single use.

Contra-Indications

All medium to lightly exuding wounds, in particular during granulation and epithelization stage, as well as deep and undermined wounds, should not be treated with absorbent wound pads.

The product should not be used in the case of a known allergy to one of the ingredients listed below.

Composition

Polypropylene, cellulose
